

Story #1: Basic Login		Priority	High
		Effort	Low
As a	user		
I want	To login to MatchMe		
So that	I can use MatchMe		

Acceptance criteria	<p>Criterion 1: Given that user does not logged in When the user access the main page of the site Then ensure that login link is shown on the page</p> <p>Criterion 2: Given that user has entered invalid email address into login form When the user click “login” button Then the user is not logged in And the login page re-renders with an error message telling them their input was invalid</p> <p>Criterion 4: Given that user has entered invalid password When the user click “login” button Then the user is not logged in And the login page re-renders with an error message telling them their input was invalid</p> <p>Criterion 5: Given that user has entered valid information into the form and left “Remember Me” unchecked When the user clicks “login” button Then the user is successfully logged into system And the user is forwarded to their profile And the login link is no longer visible in header And when the user closes and reopens their browser, they are no longer logged in</p> <p>Criterion 6: Given that user has entered valid information into the form and checked “Remember Me” option When the users click “login” button Then the user is successfully logged into system And the user is forwarded to their profile And the login link is no longer visible in header And when the user closes and reopens their browser, they are still logged in</p>
---------------------	--

<div> <div>Story #2:</div> <div>Sign up</div> </div>		Priority	High
		Effort	Medium
As a	New user		
I want	To sign up for the site		

So that	I can have my own profile and use the matchmaking system
Acceptance criteria	<p>Criterion 1: Given that user is not logged in When user access the homepage of the site Then the user can see the signup link in the header</p> <p>Criterion 3: Given that user has entered an invalid email address into form When the user click submit button Then ensure the user should not be registered</p> <p>Criterion 4: Given that user has entered password does not match When the user click submit button Then ensure the user should not be registered</p> <p>Criterion 5: Given that user has entered valid information into sign up form When the user click submit button Then the user is forwarded to “Create Profile” form</p> <p>Criterion 6: Given that the user has left required fields in the profile form blank When the user clicks submission button Then the page re-renders with relevant error messages</p> <p>Criterion 7: Given that the user has entered invalid information into one or more fields in profile form When the user clicks submission button Then the page re-renders with relevant error messages</p> <p>Criterion 8: Given that user has entered valid information into the “Create Profile” form When the user clicks submit button Then the user is successfully registered And the user is forwarded to their profile</p> <p>Criterion 9: Given that user is logged in When the user opens the registration page Then ensure the the user should be forward to my profile</p>

--	--

<div>Story #3:</div> <div>Edit user profile</div>	Priority	L
	Effort	M
As a	user	
I want	To edit my profile	

So that	My profile is up to date
Acceptance criteria	<p>Criteria 1: User that is not logged in cannot see ‘Edit Profile’ link in header menu GIVEN THAT user does not logged in WHEN user visit to any page of the site THEN user should not see an ‘Edit Profile’ link in header</p> <p>Criteria 2: User that is not logged in cannot see ‘Edit Profile’ page GIVEN THAT user does not logged in WHEN user go to the Edit Profile page by absolute path THEN user should be redirected to the login form</p> <p>Criteria 3: User that is logged in cannot access ‘Edit Profile’ page of another user GIVEN THAT user logged in to website WHEN user go to the Edit Profile page of another user by absolute path THEN user should be redirected to the homepage</p> <p>Criteria 4: User that is logged in can see ‘Edit Profile’ link in header menu GIVEN THAT user is logged in WHEN user go to any page of the site THEN user should be able to see the ‘Edit Profile’ link in the header menu</p> <p>Criteria 5: User that is logged in can see ‘Edit Profile’ page for their user profile GIVEN THAT user is logged in WHEN user go to the Edit Profile page of my profile THEN the page should render And user should see a form for editing my profile</p> <p>Criteria 6: User can successfully edit their own profile after submitting valid information GIVEN THAT user has entered valid information into the Edit Profile form WHEN user click Submit THEN user should be forwarded to my successfully updated profile</p> <p>Criteria 7: User cannot successfully edit their profile after entering invalid information GIVEN THAT user has entered invalid information in the Edit Profile form WHEN user click submit THEN the ‘Edit Profile’ page re-renders with an error message</p> <p>Criteria 8: User can successfully edit their profile after entering valid information GIVEN THAT user has entered valid information in the Edit Profile form WHEN user click submit</p>

	<div>THEN the user is forwarded to their updated profile</div> <div>AND a message appears telling them their profile was successfully updated</div>
--	---

<div>Story #4:</div> <div>View user matches</div>	Priority	High
	Effort	High
As a	Non-admin user	
I want	To view the matches index	

So that	I can see people I have matched up with
Acceptance criteria	<p>Criterion 1: Given that the user is not logged in When the user opens the matches page of any user Then the user is redirected to the login page And a message appears telling them they need to login</p> <p>Criterion 2: Given that the has a non-admin account When the user logs in Then the user can see the “Matches” link in header</p> <p>Criterion 3: Given that the user is not logged in When the user visit any page of the site Then the user cannot see the “View Matches” link</p> <p>Criterion 4: Given that the user is logged in as a non-admin When the user clicks “Matches” link in header Then they are taken to their matches page And their matches (if any) are ordered by match percent</p> <p>Criterion 6: Given that the user is logged in as a non-admin When they attempt to open the matches page of another user Then they are redirected to their own matches page</p> <p>Criterion 7: Given that the user is logged in as an admin When they attempt to open their non-existent matches page Then they are redirected to the users index page</p> <p>Criterion 8: Given that the user is logged in as an admin When they are on any given page of the website Then they cannot see the “Matches” link in header but instead see “Users” link in it’s place</p>

Story #5:	View profile	Priority	High
		Effort	High

As a	Non-admin user
I want	To view my profile and the profile of other users
So that	I can view my profile data and that of other users
Acceptance criteria	<p>Criterion 1: Given that the user is logged in as a non-admin When the user clicks the “Account” drop down menu Then the user can see the “Profile” link to their profile</p> <p>Criterion 2: Given that the user is not logged in When the user is on any given page of the website Then they cannot see “Profile” link (or “Account” drop down menu)</p> <p>Criterion 3: Given that the user is logged in as an admin When the user is on any given page of the website Then they cannot see “Profile” link in “Account” menu</p> <p>Criterion 4: Given that the user is logged in as a non-admin When the user clicks the “Profile” link in header Then they are taken to their profile page</p> <p>Criterion 5: Given that the user is logged in as a non-admin When the user clicks the “Profile” link in header Then they are taken to their profile page</p> <p>Criterion 6: Given that the user is not logged in When the user attempts to visit profile page of any given user Then they are redirected to the login page</p> <p>Criterion 7: Given that the user is logged in as a non-admin When the user is on their profile page Then they can see the links for “Likes” and “Liked by”</p> <p>Criterion 8: Given that the user is logged in as a non-admin When the user opens the profile page of another user Then they cannot see the “likes” and “liked by” links</p>

	<p>And they can instead see the “like”/”unlike” button</p> <p>And the match percent if the two users have been matched up</p> <p>Criterion 9:</p> <p>Given that the user is logged in as an admin</p> <p>When the user opens the profile page of another user</p> <p>Then they cannot see the “Likes”/”Unlike” button</p> <p>And can see the “Delete” button in it’s place</p>
--	---

Story #6: Basic Logout		Priority	High
		Effort	Medium
As a	user		
I want	To logout from the site		
So that	I am no longer logged into the site		

Acceptance criteria	<p>Criterion 1:</p> <p>Given that the user is logged into website</p> <p>When the user go to any page</p> <p>Then ensure the user can find the “Logout” link in the “Account” menu</p> <p>Criterion 2:</p> <p>Given that the user is not logged into website</p> <p>When the user is on any given page</p> <p>Then they cannot see the “Logout” link in header</p> <p>Criterion 3:</p> <p>Given that the user logged in</p> <p>When the user clicks the “Logout” link</p> <p>Then the user is logged out</p> <p>And they are redirected to the homepage</p>

Story #6: Basic Logout		Priority	High
		Effort	Medium
As a	user		
I want	To logout from the site		

So that	I am no longer logged into the site
Acceptance criteria	<p>Criterion 1: Given that the user is logged into website When the user go to any page Then ensure the user can find the “Logout” link in the “Account” menu</p> <p>Criterion 2: Given that the user is not logged into website When the user is on any given page Then they cannot see the “Logout” link in header</p> <p>Criterion 3: Given that the user logged in When the user clicks the “Logout” link Then the user is logged out And they are redirected to the homepage</p>

Story #7: Update account settings		Priority	High
		Effort	High
As a	User		

I want	To change the email or password
So that	I can keep my account up to date
Acceptance criteria	<p>Criterion 1: Given that user does not logged in When the user go to any page of the site Then the user cannot see the “Settings” link in header</p> <p>Criterion 2: Given that user is not logged in When the user go to the Account Settings page by absolute path Then the user is redirected to the login form</p> <p>Criterion 3: Given that user logged in to website When the user go to the Account page of another user by absolute path Then the user is redirected to their homepage</p> <p>Criterion 4: Given that user logged in to website When the user go to any page of the site Then the user should be able to see the ‘Settings’ link in the header menu</p> <p>Criterion 5: Given that user logged in to website When the user go to ‘Account Setting’ page Then ensure the page should render And ensure that user is able to see a form for Update Settings</p> <p>Criterion 6: Given that user has entered a valid email address into form When the user clicks “Submit” button Then the user’s email address is updated and they may login using it instead of their old one</p> <p>Criterion 7: Given that user has entered invalid email address into form When the user click “Submit” button Then the user account should not be updated And the Account Settings page should re-render with an error message telling them the email they entered was invalid</p> <p>Criterion 8: Given that user has entered two different passwords When the user click “Submit” button</p>

	<p>Then the user account should not be updated And the Account Settings page should re-render with an error message telling them the passwords do not match</p> <p>Criterion 9: Given that user has entered a valid password and it matches the password confirmation When the user click “Submit” button Then the user’s password is updated And they are forwarded to their homepage And a message renders telling them their account has been updated</p> <p>Criterion 9: Given that user has entered an invalid password When the user click “Submit” button Then the user account should not be updated And the Account Settings page should re-render with an error message telling them the password they entered was invalid</p>
--	---

Story #8: Delete user		Priority	M
		Effort	M
As a	Admin		
I want	Delete a user		
So that	The user no longer exists in the database		

Acceptance criteria	<p>Criterion 1:</p> <p>Given that the user is logged in as an admin When the user is on any given page Then they can see the link for “Users” in header</p> <p>Criterion 2:</p> <p>Given that the user is logged in as an admin When the admin visits the users index page Then the page renders with a list of all users in the database And a delete link for each user</p> <p>Criterion 3:</p> <p>Given that the user is logged in as an admin And the admin is on the users index page When the admin clicks the “delete” link of a given user and clicks “Confirm” Then the user is successfully removed from the database And the page re-renders with a message telling the admin the user was successfully deleted And the user is no longer listed on users index page</p> <p>Criterion 4:</p> <p>Given that the user is logged in as an admin When the admin visits the profile of another user Then they can see a “Delete” button to the left of the users’ name</p> <p>Criterion 5:</p> <p>Given that the user is logged in as an admin and on another users’ profile page When the admin clicks the “Delete” button and clicks “Confirm” Then the user is successfully removed from the database And the admin is redirected to the users index And a message appears telling the admin the user was successfully deleted And the user is no longer listed on users index page</p> <p>Criterion 6:</p> <p>Given that the user is not logged in as an admin When the user is on any given page Then they cannot see the “Users” link in header</p> <p>Criterion 7:</p> <p>Given that the user is not logged in as an admin When the user attempts to open the users index page Then they are redirected away from it</p> <p>Criterion 8:</p> <p>Given that the user is not logged in as an admin When the user attempts to delete another user Then they are instead redirected to the homepage, or login page if not logged</p>
---------------------	---

	<div>in</div> <div>Criterion 9: Given that the user is not logged in as an admin When the user visits the profile of another user Then they cannot see the “Delete” button</div>
--	--

<div>Story #9:</div> <div>Like a user</div>		Priority	L
		Effort	M
As a	Non-admin user		
I want	like other user		

So that	I can show the other user that I like them
Acceptance criteria	<p>Criterion 1: Given that the user is logged in as a non-admin When the user views another user’s profile page Then the user can see the “Like” button (or “unlike” if user has already liked them)</p> <p>Criterion 2: Given that the user is logged in as a non-admin and on another user’s profile When the user clicks the “Like” button Then the button turns into an “Unlike” button And the liked user is now listed in the users’ “Likes” page</p> <p>Criterion 3: Given that the user is logged in When the user visits their own profile Then they cannot see the “Like” button</p> <p>Criterion 4: Given that the user is logged in as an admin When the admin visits the profile of another user Then they cannot see the “Like” button</p>

Story #10:	Unlike a user	Priority	L
		Effort	M

As a	Non-admin user
I want	To unlike a user
So that	I can show I don't like them anymore
Acceptance criteria	<p>Criterion 1: Given that the user is logged in as a non-admin When the user views another user's profile page And the user has previously liked this user Then the user can see the "Unlike" button</p> <p>Criterion 2: Given that the user is logged in as a non-admin and on another user's profile When the user clicks the "Unlike" button Then the button turns into a "Like" button And the unliked user is no longer listed on the users "Likes" page</p> <p>Criterion 3: Given that the user is logged in When the user visits their own profile Then they cannot see the "Unlike" button</p> <p>Criterion 4: Given that the user is logged in as an admin When the admin visits the profile of another user Then they cannot see the "Unlike" button</p> <p>Criterion 5: Given that the user is logged in When the user visits their own profile Then they cannot see the "Unlike" button</p>

Story #11:	View likes	Priority	L
------------	------------	----------	---

		Effort	M
As a	Non-admin user		
I want	To view the users I have liked		
So that	I can find them easier		
Acceptance criteria	<p>Criterion 1: Given that the user is logged in When the user opens their profile page Then they can see the “Likes” button below their age and location with no. of users they have liked</p> <p>Criterion 2: Given that user is logged in When the user goes to another user’s profile page Then the user cannot see the “Likes” button on the page</p> <p>Criterion 3: Given that the user is logged in and on their profile page When the user clicks the “Likes” button Then their “Likes” page renders with users they have liked (if any) And the “Return to profile” link appears</p> <p>Criterion 4: Given that the user is logged in When the user tries to open another user's’ “Likes” page Then they are redirected away from it</p> <p>Criterion 5: Given that the user is logged in as an admin When the user tries to open their (non-existent) likes page through absolute path Then they are redirected to the users index</p>		

Criterion 6:

Given that the user is not logged in

When the user tries to open the “Likes” page of any given user

Then they are redirected to login page

Story #12:View users who have liked you		Priority	L
		Effort	M
As a	non-admin user		
I want	To view the users who have liked me		
So that	I can know who likes me		
Acceptance criteria	Criterion 1: Given that the user is logged in When the user opens their profile page Then they can see the “Liked by” button below their age and location with no. of users who have liked them		
	Criterion 2: Given that user is logged in When the user goes to another user’s profile page Then the user cannot see the “Liked by” button on the page		
	Criterion 3: Given that the user is logged in and on their profile page When the user clicks the “Liked by” button Then their “Liked by” page renders with users that have liked them (if any) And the “Return to profile” link appears		
	Criterion 4: Given that the user is logged in When the user tries to open another user's’ “Liked by” page Then they are redirected away from it		
	Criterion 5: Given that the user is logged in as an admin When the user tries to open their (non-existent) liked by page through absolute path Then they are redirected to the users index		
	Criterion 6: Given that the user is not logged in When the user tries to open the “Liked by” page of any given user Then they are redirected to login page		

--	--

Story #13: Search users by name		Priority	L
		Effort	M
As a	an admin		
I want	to search all users by name		
So that	I can easily find users		

Acceptance criteria

Criterion 1:

Given that the user is logged as an admin

When the user opens the users index page

Then they can see the search bar at the top of the page

Criterion 2:

Given that the user is logged as an admin and on users index

When the user enters all or part of a name

Then the users index will be filtered by users who have the search characters in either their first or last name
